

Essential technology, done right™

Software Internship

ABOUT MARVELL

At Marvell, we believe that infrastructure powers progress. That execution is as essential as innovation. That better collaboration builds better technology. Trusted by the world's leading technology companies for 25 years, we move, store, process and secure the world's data with semiconductor solutions designed for our customers' current needs and future ambitions. Through a process of deep collaboration and transparency, we're ultimately changing the way tomorrow's enterprise, cloud, automotive, and carrier architectures transform—for the better.

The data infrastructure that our customers build has never been more critical to our global economy. It's what's keeping the world connected, businesses running, and information flowing. If you're ready to excel, innovate, and truly enjoy your work, apply now for the position detailed below.

ABOUT THE ROLE

- Developing applications (coding, programming)
- Debugging and testing code
- Documenting and testing new software applications
- Researching, investigating and fixing a wide range of technical issues
- Collaborating with senior leaders
- Approaching problems and creating solutions

ABOUT YOU

Typically requires a Bachelor's degree in Computer Science, Computer Engineering, Electrical Engineering or related fields, or the equivalent work experience that provides knowledge and exposure to theories, principles and concepts.

BENEFITS

- Competitive compensation and benefit package
- Exciting internal events
- Hybrid work model
